FOR BETTER RESULTS HOME CARE PRODUCTS
ARE HIGHLY RECOMMENDED

Facials involve a cleansing procedure, a massage and steam, and the application of a facemask. What they help to do is remove the dead, dull outer layer of cells that make up the skin's surface or epidermis along with pollutants. The massage, which is an important part of a facial, helps blood circulation, which in turn aids lymphatic drainage (the removal of toxins and waste from the body). A massage also relaxes the facial muscles and is very important to delay the onset of wrinkles. The face is steamed during a facial for two main reasons. Firstly, steam helps the skin absorb cream better. Secondly, it helps in softening blackheads and whiteheads so that they can be removed easily. The application of a facemask in the end helps tone and clarifies the skin. Facemasks are also used to treat dry and acne-ridden skin.

Finally a facial will Cleanse, Balance, Rehydrate and tighten and brighten your skin which will leave you feeling relaxed, refreshed and your skin feeling softer & cleaner.

Every face is unique, so you should choose a facial treatment that suits your skin type. Our expert beauty therapist will help to choose the right treatment by looking at your skin type, whether you have dry, oily or combination from a list of high end international branded products.

Body Baths

Moroccan Bath (Middle Eastern) 60 mins | Rs. 4000

Traditional Moroccan black soap is applied and left to penetrate the skin in a steam bath (we bring it to you!) to help hydrate and nourish the skin. Our Moroccan therapist will commence with an invigorating exfoliation with the Kassa. A special whitening soap is massaged into the body for further cleansing before finishing off with a final moisturizer.

Additional Keratin Mask Rs. 1600
